Anvendt statistik for de finansielle uddannelser er en ny, praksisorienteret lærebog med eksempler på brugen af statistik og statistiske begreber inden for den finansielle sektor. Formålet med bogen er at give læseren et godt kendskab til de metoder, hvormed et datamateriale kan bearbejdes, således at der kan udledes statistisk begrundede konklusioner. Bogen har derfor fokus rettet mod de modeller og værktøjer, hvormed forskellige statistiske tests kan udføres. Hovedvægten er lagt på anvendelsen og fortolkningen af hypotesetests og andre teknikker. Lærebogen er rettet mod statistikundervisningen på finansøkonom, finansbachelor, financial controller, akademiuddannelsen i finansiell rådgivning og HD, men også de økonomiske og samfundsvidenskabelige uddannelser, hvor faget statistik indgår.
